FARM REPORT

71 degrees at 3:00 AM, April 29, 2016

Historic Norm (for 5/2) 85 HIGH, 66 LOW Weather Underground: <http://www.wunderground.com/>

See the complete weekly weather report later in the Farm Report.

Okra Fruit Arrives: First Fruits Given To The Earth First Shares Ready

We harvested our first okra pods this week. More is coming in everyday. There is not enough for large shares yet, but we can likely include a few pods in any share request. We have planted heavily this year, and we are anticipating substantial harvests. If anyone would like seeds or seedlings, let us know. We receive a donation for seeds or seedlings. Remember: our seeds are from plants grown here at the gardens, with a genealogy going back four to six years. We save seeds from the strongest, highest yielding plants for use the following year.

Sweet Potatoes Doing Well

As noted in last week's report, we have 500 slips in the ground at the two major gardends – Grand Gardens and 3F/East Madison Gardens – 250 Georgia Jets, 225 Beauregards (equally divided between the two gardens), and 25 Dianes at the East Madison Gardens.

The above normal heat and lack of rain stresses the young slips. So far so good, thanks to a very serious and concerted commitment by the community. Folks are watering the large planting every day, and we've constructed hoop houses to shade the slips at the Grand Gardens.

We'll have another order shortly – 150, total. If you would like slips for your own garden, let us know. When the order arrives we'll notify you, and you can come by and pick them up.

Shares are familiar with Jets and Beauregrads. These are the varieties we've been growing for years. Dianes are little more exotic, and apparently not a commercial variety. They are this year's experiment. Dianes are also called Red Yams (of course they are sweet potatoes, not yams). Here is a little summary from a California website:

Diane or Red Yams... Extra moist and flavorful, these potatoes are orange on the inside with red copper to plum colored skin. The Garnet is the premium red yam and well worth the extra money if it is available. Best baked in the skin and served with butter, these sweet potatoes also do well in pies, cakes and breads. (<http://www.avthomasproduce.com/california.html>)

By mid-July we should have our first sweet potatoes – early August at the latest. We'll have sweet potato leaves in another week or two, and then through the summer, until September. Vines and leaves are wonderful warm-weather leafy green vegetable – one of the few available through the summer in Florida.

We acquire our slips from George's Plant Farm in Martin, Tennessee. George's is a family farm, with a wonderful story. To learn about the Dellinger Family and their farm, here is a link to their website: <http://www.tatorman.com/>

Last year we had 300 slips in our two gardens, and total production of about 200 pounds. This year, we are looking to increase the planting to 700-800 slips, and we are aiming for 500 pounds of harvest at both locations. We usually place three orders from George's, one in April, one in May, and one in June. This allows us to distribute the planting over three months, which means we are also distributing the harvest over three months. Those who were following the *Farm Report* last year remember that this method worked very well, and allowed us to have sweet potatoes through October.

Don't forget, Sweet Potato leaves and vines are a delicious warm weather green. We'll have those listed in the share report very soon.

Peanuts Started

We started the second planting of peanuts. The first was from our own seeds saved from last year. These second generation seeds all germinated and we've planted all of them. This year, we've gone heavy on peanuts, and found a good range and variety at Southern Exposure Seed Exchange.

We've started Schronce's Deep Black and Texas Red and White. They have not germinated but the germination rates reported by Southern Exposure are high.

Black Berries Flowering

Our black berry shrubs are flowering profusely. Look for the first berries in another month or so. The plants have reseeded, so we'll have some blackberry shrubs to share with others.

Planting Picks Up Spring Seedings At Gardens Seeds & Seedlings Available for Your Gardens

We are starting more seeds every week- a lot more.

So far, we have sprouted okra, three types of eggplant, lima beans, snap beans, and three varieties of cucumbers, and peanuts. Many are now in the gardens, and most are doing quite well. We are still behind on the planting, although we are beginning to catch up.

We've planted okra in the East Madison Gardens and at Grand Gardens, eggplant at East Madison, and beans and cucumbers at both gardens.

The five okras we are featuring this season are Star of David, Hill Country Red, Silver Queen, our own hybrid Rouge Lance, and Red Burgundy. All are at or close to 100% germination.

These are all warm weather crops, and the unseasonal heat has sped their growth. This is in part due to many of our seeds having come from our garden, and being descendants of locally acclimated plants going back at least five years and in some cases ten.

If you would like seeds or seedlings for okra, please send us a request. See below for more details.

We have the five okras noted above as well eggplant. Soon we'll have seedlings for peanuts and eggplant. Our okra seeds and seedlings are from the 3F gardens and farms. They are acclimated to the Springs Coast Watershed, and the central Gulf Coast, generally.

We also have a wide variety of heirloom organic seeds from Seed Savers Exchange. Let us know what you would like and we'll accommodate your interests.

Broccoli Ends Its 2016 Run

Our best broccoli season in years comes to its close. We harvested over 200 heads.

We are composting the plants and letting the stronger ones flower (now) and go to seed. The flowers are being mobbed by bees.

See later report on Fauna for story about honey bees at the broccoli flowers.

What To Plant?

It is time to begin planting warm-weather gardens. If you still have cool weather crops (e.g.: kale, broccoli, lettuce, and swiss chard) in the ground, it is recommended that they be removed and used for compost. They will not get much bigger now that the heat is rising and they will require copious quantities of water. The one exception is that wonderful stable – collard greens. They can take the heat better than any other cool weather crop, and we've heard reports of folks growing them well into the warm season.

For gardens in the New Port Richey Farm Network (Friendship Farms & Fare and Grand Gardens), we are recommending the following vegetables for warm-weather gardens (Spring and Summer):

Cucumbers (Spring only – plant soon)

Peppers (Spring best – plant soon)

Tomatoes (Spring best – plant soon)

Beans (Lima and string/bush and pole)- we recommend lima and bush

Eggplant
Okra
Peanuts
Sweet Potatoes

We recommend these vegetables on the basis of their suitability for our area, our history of growing them, their high-yield, and because they are relatively easy to grow. Folks are welcome to try other warm-weather vegetables.

We are offering seeds and seedlings of these vegetables to folks in the New Port Richey Farm Network (Friendship Farms & Fare and Grand Gardens) for a contribution. If you have a plot at Grand Gardens we will gift you seedlings – you can share a donation if you like.

Folks who desire seeds can acquire them for a donation (suggested \$2 per pack). If we don't have what you desire, go to Seed Saver's Exchange website, pick the items you want, then give us your order. Seeds are offered with suggested donations of \$3 or \$2 for 3F and GG participants (CSA members, plot holders, and contributors). See the SSE website: <http://www.seedsavers.org/>

Winter Garden Closing Out

Our winter garden has surpassed all previous records, but it is now closing out

Broccoli is closed, and swiss chard and kale are nearing close. Swiss chard will likely be finished by next week.

We will have spotty winter harvests through April, and Collards until early June – at least.

Shareholders are invited to come by the gardens for extra large shares of collards – just call in advance so we can be sure someone is at the farm.

Shares with the delivery amenity can request an "all collards" share, which will be double the usual share. – just call in advance so we can be sure someone is at the farm.

Grand Gardens Taking Off Promotional T-Shirts Available Order Now

We'll be supporting Grand Gardens with okra seedlings and sweet potato slips. We'll also share eggplant and beans as desired by community growers.

As a fund-raiser and promotional collectable object for Grand Gardens, we are offering a T-Shirt as a premium for contributions to the project. The T-Shirt has the Grand Gardens logo on the front and supporting organizations on the back. We are affirming a minimum donation of \$15 for each shirt, and receptive to greater contributions to support the project – which will allow us to make the shirt available folks who might not otherwise be able to afford the shirt.

Contributions of over \$15 (our cost) will receive formal acknowledgement of contribution for purposes of tax deductions, if requested – with actual value being \$10.

Make checks to Friendship Farms & Fare PO Box 596 • New Port Richey, Florida 34656-0596 or go to the Ecology Florida website <http://www.ecologyflorida.org/> and click on the donate button.

If you want us to mail you a shirt, please give your size, and mailing address and add a little extra contribution for postage.

Folks interested in acquiring a plot at Grand Gardens can contact us through the 3F site. If you would like to participate, contact Travis Morehead, or stop by Grand Gardens on one of the designated work days: <http://eastmadison.org/community-garden-calendar/>

Shareholders interested in acquiring a plot may participate for reduced rates.

Arugula Slowing, Seeding

Arugula is slowing now, and all plants are producing flowers and seeds. Shares can still request arugula, although large quantities should not be expected.

Collard Greens Still Abundant

Collards are continuing to produce beyond all previous records. We can easily fill 2.5-gallon bags for all shares – and more if you want to come by the gardens. For folks who get deliveries, we can do a "collards only" bag for you. This would amount to two 2.5-gallon bags, totaling several pounds. There would not be much room for anything else, but you'd have a lot of collard greens.

You may not know it, but collard greens are a wonderful source of vitamins and minerals. According to George Mateljan, collards are among the world's healthiest foods. Here is a detailed account of the benefits of collards, including data on nutrients and minerals: <http://www.whfoods.com/genpage.php?tname=foodspice&dbid=138>

Collards, Nutritional Note (compared with Kale) One cup of chopped collards supplies 27% of daily calcium, 300% of the vitamin A, almost 60% of the C, and 21% of the fiber. By comparison, kale (often called a super food), comes in with 9% of the calcium, over 300% of vitamin A, 90% of the C, and 10% of the daily fiber. So, collards stack up pretty well against one our trendiest foods.

Kale Nearing Close

Kale is nearing the end of its cycle. There is enough for all shares and should be enough for a couple more weeks – but production is slowing and leaves are being scorched.

Feel free to order larger shares of kale.

Loquat Preserves

We have locally sourced and locally produced loquat preserves. Suggested donation is \$6.00 per jar and 2 for \$10.00.

**2016 Organic Seeds Now Available
Rose's Bistro in New Port Richey
University of South Florida in Tampa**

Seeds from Seed Savers Exchange for the 2016 season are now available through Friendship Farms & Fare and our kiosk sites in New Port Richey and the University of South Florida. We are pleased to support the work Seed Savers, which is dedicated to preserving heirloom varieties of fruits and vegetables. Unless we use our own saved seeds or ones from other local gardeners, we use SSE seeds exclusively. Here is a link to Seed Savers Exchange: <http://www.seedsavers.org/>

Here is a links to Rose's Bistro: <https://www.facebook.com/TheMarketOffMain>
And here is one to USF's Botanical Gardens: <http://gardens.usf.edu/>

Fresh Honey Harvest From Daddy's Bees

For those interested in local honey, Robert has just completed a summer harvest, and we have plenty of bottles on hand. 8 oz. bottles for \$7.00 (\$5.50 for shares).

Please do not purchase or use insecticides with neonicotinoids. Here are reliable sources on the neonicotinoids, and the commercial "home and garden" insecticides that contain them.

<http://www.xerces.org/neonicotinoids-and-bees/>

**WEATHER
Early Summer?
90s arrive early in the week
Rain possible on Wednesday and cooler at end of week**

71 degrees at 3:00 AM, April 29, 2016

Historic Norm (for 5/2) 85 HIGH, 66 LOW Weather Underground: <http://www.wunderground.com/>

See the complete weekly weather report later in the Farm Report.

January, February, and March shatter heat records – all were the hottest on record. Read more:
<http://www.cnn.com/2016/03/17/weather/february-warmest-ever-month/index.html>

<https://www.washingtonpost.com/news/energy-environment/wp/2016/04/15/scorching-march-temperatures-set-another-global-record-for-the-third-straight-month-this-year/>

According to NASA and NOAA, 2015 was the hottest year in recorded history – replacing 2014 as the hottest year on record (since records have been kept, 1880). Read more:

http://www.nytimes.com/2016/01/21/science/earth/2015-hottest-year-global-warming.html?_r=0

Average temperatures are increasing and will continue to until early June, when they reach 90, and stay there until early September. Historically, the average high temperature is now 85 degrees, fifteen degrees higher than our lowest average high of the year [70], and five degrees lower than our highest average [90]. Our average low is now 66 degrees, twelve degrees lower than our highest average low of the year (76), and fifteen degrees higher than our lowest average low [51].

Here is NOAA on the human causes of climate change and global warming. <http://oceanservice.noaa.gov/education/pd/climate/factsheets/howhuman.pdf>

Last Week (4/22 – 4/28): Last week was warmer than normal, with daily highs once again higher than historic norms everyday except one. Highest high was 87 (three degrees above normal), Lowest high was 81 (one degree below normal).

This Week (4/29 – 5/6): Temperatures will be well above normal early in the week, with 90s expected Sunday, Monday, and Tuesday. Rain looks likely on Wednesday, as a weak front arrives. Cooler temperatures are forecast for the rest of the week

Garden Overview

As suggested in earlier sections of the report, we are well along with our spring and summer planting, and the winter garden is coming to a close. Broccoli is closed and swiss chard will soon follow.

We harvested more winter vegetables last week, sharing with neighbors and shareholders.

We will continue planting sweet potatoes this week, with the arrival of our shipment from George's Plant Farm. We will continue developing beds for spring and removing spent winter crops from the current beds.

If you would like to volunteer, please let us know.

See the Share Report for all items.

For all plantings, we use seeds from our collection or heirloom seeds from Seed Savers Exchange (<http://www.seedsavers.org/>).

Honey: Local honey is available. We have a fresh harvest available now. Our bee husbander, Robert, has been very successful with recent harvests. We support Robert's work, which is as much about sustaining and regenerating bee populations as it is about honey distribution. Robert's bees live in West Pasco County, near New Port Richey, they pollinate wild flowers, domestic fruit trees, and vegetables. Honey is available in 8 oz. bottles for \$7.00 a bottle, \$5.50 for CSA Shares.

Herbs: Herbs are in pretty good shape, but cilantro is down again. We have good quantities of basil, tarragon, and oregano. Consult the share list for other herbs, and other available items.

The Share
May 2, 2016 (31)
* larger quantity available if desired

Vegetables

Arugula

Collards*

Kale

Lettuce – in recess

Okra – first fruits (a few pods just to get us going)

Peppers – Sweet Bell (possible)

Peppers – Habanero (burning hot)

Peppers – Scotch Bonnet (burning hot)

Sweet Potato Leaves coming soon

Swiss Chard - light

Fruit -

Herbs (* larger quantity available if desired)

Basil – Italian

Basil – globe (in recess)

Basil – Red Basil (in recess)

Chives

Cranberry Hibiscus *

Cilantro

Culantro – light

Mint

Oregano

Parsley *

Rosemary*

Tarragon

Medicinal

Aloe

Other items and Samples

Eggs: In extended recess. When we again have a reliable local, organic producer, we will add eggs back to the list.

Honey: Local West Pasco honey from Daddy's Bees is available in 8 oz. bottles for \$7.00 (\$5.50 for shares).
Daddy's Bees just harvested their summer honey. Ready for shares, if desired.

Loquat Preserves: Made from local cottage industry producers. All organic materials, local source loquats.
Suggested donation: \$6, two for \$10

Red Panax Ginseng (liquid, tonic) 3.5 oz bottles (10 bottle box) \$6.50 (\$5.00, shares)

COMPANION FAUNA

Early Spring Report

Animal companions are fewer and less active

Honey Bees: Fewer than recently, mostly at the beggar ticks.

"If the bee disappeared off the surface of the globe, then man would have only four years of life left. No more bees, no more pollination, no more plants, no more animals, no more man."

– attributed to Albert Einstein.

Please do not purchase or use insecticides with neonicotinoids. Here are three reliable sources on the neonicotinoids, and the commercial "home and garden" insecticides that contain them.

<http://www.xerces.org/neonicotinoids-and-bees/>

http://www.xerces.org/wp-content/uploads/2012/03/NeonicsSummary_XercesSociety.pdf

http://www.xerces.org/wp-content/uploads/2012/03/Are-Neonicotinoids-Killing-Bees_Xerces-Society1.pdf

Leopard Frogs: Male sings day and night

Here is good site for information on Leopard Frogs

http://www.wec.ufl.edu/extension/wildlife_info/frogstoads/rana_utricularia.php

Swifts: Swifts have returned: nesting in chimney (swift lodge), and active at dusk in the low sky.

Tree Frogs: Abundant, with several eggs clusters, and swarms of tadpoles.

Bald Eagle: None this week.

Raccoon: None this week

Opossum: None this week.

Citrus Rat (also called Roof Rat): Right at home in laurel oak in natural habitat near street – late at night.

Here is the IFAS report on these rats ("the worst rodent pest in the state of Florida and most abundant"):

<http://edis.ifas.ufl.edu/pdffiles/uw/uw12000.pdf>

Florida Ringneck Snake: None

Mediterranean Gecko: None this week.

<http://myfwc.com/wildlifehabitats/nonnatives/reptiles/mediterranean-gecko/>

Owl: No owls or calls this week.

Greenhouse Frog: None this week.

Eastern Blue Bird: No blue birds

<https://www.youtube.com/watch?v=1WlYEmuUhKI>

http://www.allaboutbirds.org/guide/Eastern_Bluebird/id

<http://www.audubon.org/field-guide/bird/eastern-bluebird>

Southern Toad: None this week.

Sweet bees: None this week

Pileated Woodpecker: None this week.

Here is a good site for the Pileated :

[http://www.audubon.org/field-guide/bird/pileated_woodpecker?
gclid=Cj0KEQiA4OqnBRDAj9aazyPji9ABEiQANq28oLTa9kUEg7khhlQxXQSzXno1KGGEkjIUYhQcrnafj8aAnMP8P8
HAQ](http://www.audubon.org/field-guide/bird/pileated_woodpecker?gclid=Cj0KEQiA4OqnBRDAj9aazyPji9ABEiQANq28oLTa9kUEg7khhlQxXQSzXno1KGGEkjIUYhQcrnafj8aAnMP8P8HAQ)

And here is a video:

<https://www.youtube.com/watch?v=SpYsdZ8gUU8&index=3&list=PLFMP2eIAO8oQFZ3IyCJhIKXCi914uI8uu>

Florida Black Snake: One observed crossing street (Jackson) near gardens. Stopped car to let the snake pass.

Bumble Bees: None this week.

Hawk: Red shoulder hawk flying south east over the East Madison Gardens.

Earth Worms: One in mulch pile at East Madison Gardens

Sphinx Moth: No sphinx this week. Here is Youtube video of a Sphinx Moth feeding at 4 o'clocks, very much like the moth at the 3F farm. <https://www.youtube.com/watch?v=eaTfKLO96gE>

Pygmy Rattlesnake: No pygmy rattler this week. Here is a good site on the pygmy rattlesnake from the University of Florida: <http://ufwildlife.ifas.ufl.edu/pdfs/Pygmy%20Rattlesnake%20Info%20Sheet.pdf>

"Nocturnal Garden Spider" – Very numerous – like stars in the ground. More in the south garden than in the north.

"Asian Tramp Snail." None this week.

Woodlouse – None this week.

Marine Toad (aka: Brazilian Cane Toad, *Rhinella marina*, Giant Toad): None.

Marine Toads are destructive of ecosystems and poisonous to mammals. They are omnivorous, aggressive, and drive out native and assimilated frogs and toads. A survey of several professional sites found none that recommended killing the frogs, although this has been advocated by several folks in the area.

Here is the Extension Office's website on the Marine Toad (which includes an audio of its call): http://www.wec.ufl.edu/extension/wildlife_info/frogstoads/rhinella_marina.php

Here is a very detailed, professional study of the Marine Toad, also from the Extension Office. This site has instructions for humane euthanizing of the creatures:

http://www.egovlink.com/public_documents300/winterhaven/published_documents/Winter%20Haven/Lakes/Backyard%20Wildlife/Animal%20Information/Frogs%20and%20Toads/Marine%20Toads%20UWo4600.pdf

Cats: Neighborhood cat, Frankie, appears to have taken up residence on the property. She is a pleasant little cat.

Planting & Harvest Notes Winter Seeding and Garden Starts Continue

Seedings: okra, eggplants, peanuts

Garden Starts: okra, eggplants, sweet potatoes, black beans

Harvest Notes: collards, kale, swiss chard, peppers, all herbs that were mature

Vermipost: 20 pounds

3F Stories, Events, and Policy Updates

Programs and Plans

We often receive questions about the Friendship Farms & Fare project. We are happy to send an information brochure with details on our mission and our various programs. Here is a brief sketch of our programs:

We offer heirloom organic **seeds**, including seeds from plants acclimated to local climate and soils. We have a good stock of several types of okra (including the much desired Red Burgundy), robust arugula, and our famous Calabrese Broccoli. Friendship Farms & Fare is a licensed seed dealer in the State of Florida, and a member of Seed Savers Exchange (with several listings in the SSE Yearbook).

Seed Kiosk Friendship Farms & Fare also sponsors a sales kiosk featuring organic seeds from Seed Savers Exchange at the Market Off Main, in New Port Richey. We never offer seeds from for-profit commercial seed sellers, and we discourage others from doing so as well. Acquiring your seeds from local seed dealers supports local ecologies and economies, and will usually result in stronger, healthier plants – and seeds for next season!

Organic **seedlings** are available throughout each growing season. We use our own seeds from previous years whenever possible, and otherwise, we use only organic seeds and heirloom varieties when available. We never use seeds from for-profit seed sellers, and we do not offer seedlings grown from such seeds. Friendship Farms & Fare is a licensed nursery in the State of Florida.

A developing area of our mission is our **fruit tree project**. At present, we offer loquat and avocado trees, with a few native flowering shrubs. We are a state-registered nursery, and among a small number of nurseries in the region offering loquat trees. We also are pleased to host (along with Ecology Florida) the **Florida Loquat Festival**, held each spring in New Port Richey.

Our original project, and still our central focus is a **Community Supported Agriculture** program. This is a small (“boutique”) CSA, featuring organic produce from our gardens and local cottage industry foods. We are 100% organic and have a no-kill policy. Our program is recommended for single persons, couples, or (at most) three-person families.

When quantities are sufficient, we offer produce to the general public through **local markets**, such as Tasty Tuesdays and Market Off Main in New Port Richey. Folks can also make requests through our website. Non-members can request any and all items on the share list for \$20.

Our newest project is a **community garden**, dedicating a portion of the 3F farm for use by others in the community. The community garden is located in New Port Richey, and operates through the City's urban agriculture ordinance. The 3F community garden follows the standard policies of Friendship Farms & Fare. We are 100% organic, non-GMO, and have a no-kill policy. With the exception of the predatory Marine Toad, no animals are harmed on our farm. We follow permaculture principles, and working with and within our natural systems.

If you would like to know more about any of these programs or would like to volunteer to share in our mission, just let us know. Folks interested in the Friendship Farms & Fare project can contact us through our website. <http://www.fffsite.org/> See the "Let's Talk" section for an email connection.

Contributions to Friendship Farms & Fare are now tax-deductable. If you would like to offer financial support, your contributions will be a wonderful enhancement to our project – and they will be tax deductible.

Spring 2016 Seeds Have Arrived

3F, Ecology Florida, Rose's Bistro, and USF Offer Seed Savers Exchange Seeds

Through a cooperative arrangement with Friendship Farms & Fare and Ecology Florida, Rose's Bistro, in New Port Richey, and the Botanical Gardens of at the University of South Florida offer a wide range of organic, heirloom, non-GMO seeds exclusively from Seed Savers Exchange.

Spring seeds are in at both locations.

This is a trend-setting achievement for the Bistro and the Botanical Gardens, and another verification of Friendship Farms & Fare and Ecology Florida's leadership in ecological stewardship, sustainability, and resiliency. These two locations are the only location on the West Coast of Florida offering these high quality packaged seeds.

Ecology Florida advances the harmonious integration of healthy natural, cultural, and economic ecologies to regenerate a sustainable world

<http://www.ecologyflorida.org/>

Seed Savers Exchange is a non-profit organization dedicated to saving and sharing heirloom seeds. Since 1975, our members have been passing on our garden heritage by collecting and distributing thousands of samples of rare garden seeds to other gardeners.

<http://www.seedsavers.org/>

USF Botanical Gardens

<http://gardens.usf.edu/>

Rose's Bistro

Next Workday

TBA

2016-2017 Nursery Certification and Registration

Friendship Farms & Fare

48015239

Friendship Farms & Fare is a registered nursery in the state of Florida. Our registration number is 48015239. We just received confirmation of our renewal for 2016-2017.

Our successful re-certification and registration renewal is another step in the development of the Friendship Farms and Fare sustainable urban agriculture project. As most of you know, we are also a registered seed seller. The nursery certification is an important expression of our farm's mission and our commitment to responsible community development.

If you would like to support the work of Friendship Farms and Fare and help us cover expenses related to the project, please feel free to share a contribution. Friendship Farms and Fare operates under the umbrella of Ecology Florida, a not for profit corporation, so your contributions are tax deductible.

**2015-2016 Renewal
Seed Dealer License & Registration
Friendship Farms & Fare
S009451**

We are also a licensed Seed Dealer License for 2015-2016.

3F is a licensed Seed Dealer, through the Florida Department of Agriculture and Consumer Services, which issues these licenses that are required to sell seeds to the public.

We renew in July every year. Through our friendship with Ecology Florida, we apply for the license as a subsidiary of Ecology Florida – a federally sanctioned Not For Profit organization.

Want to buy some seeds?

To explore the Ecology Florida project, see: <http://www.ecologyflorida.org/>

Grand Gardens Project

The Grand Gardens' project is proceeding very nicely. If you would like a Grand Gardens' T-Shirt, send us a donation (\$15, suggested), your shirt size, and mailing address.

If you would like to participate, contact Travis Morehead, or stop by Grand Gardens on one of the designated work days: <http://eastmadison.org/community-garden-calendar/>

Shareholders interested in acquiring a plot may participate for reduced rates.

See earlier part of the letter for full report and opportunity to order shirts.

Folks interested in acquiring a plot can contact us through the 3F site.

Farm Tours (Local Urban Gardens)

If you would like to schedule a tour of local urban gardens in New Port Richey, please let us know, and we can make arrangements. Our tours are experiential, informational, educational, and fun. Donations are greatly appreciated.

Typically, and depending on the season, participants will spend an hour or so in two or more gardens, learn about organic farming in an urban environment using permaculture philosophies and practices, observe and learn about urban wildlife and helpful plants, and enjoy samples of live produce. Tours are structured on the basis of participants' interests and background.

Please note that an appropriate contribution for the tours and learning sessions will be suggested when tours are scheduled.

There are four categories of tours:

- * Urban Farming, Permaculture and Soil development
- * Urban wildlife and helpful plants
- * Seasonal produce, from seed to harvest
- * General (including two or more categories)

Please note that an appropriate contribution for the tours and learning sessions will be suggested when tours are scheduled – typically, \$100.

3F: A Florida Friendly Farm

The 3 F gardens are certified as a "Florida Friendly" environment – a certification we have held for over a decade.

Florida Friendly recognition is given to environments (typically residential yards) that support and enhance natural ecosystems. Certification is given in three categories (bronze, silver, and gold) based on a point system rating various features of the property and practices followed by the property owner. We received a high score but only a silver rating because of some changes in the program of which we were unaware.

Attention is given to features such as water-retention, native and drought tolerant plants, diversity in plant species, responsible irrigation systems, and amenities for native pollinators. Positive practices include minimal use of fertilizers (with organic preferred) and little or no use of poisons, groundcovers rather than turf, composting, and rainwater collection systems.

We encourage all our members and friends to pursue Florida Friendly designation for their properties. It is a wonderful way to learn more about Florida's natural ecology and what you can do to create a healthy environment right where you live. It is also a great way to go green.

Folks who wonder what they can do be more environmentally responsible are encouraged to review the Florida Friendly checklist. If you can change even one thing about your yard or your landscape practices to bring it into agreement with the guidelines, you will have made a difference. Even if you do not apply for the designation, reviewing the criteria will be an enriching educational experience. Putting the guidelines into practice will make a definite difference. Here is the website for the program:

COMMERCIAL PRODUCE REPORT

**Our Commercial Produce News Report is currently in repose.
We will resume when time and talent allow.
If anyone would like to volunteer to collect market prices, please let us know.**

OTHER PRODUCTS FOR THE CSA FAMILY

3F Produce for non-shareholders: Non-Members may order items for \$10.00 each, shares for \$20 per week, or \$50 per month. For this amount, contributors may request any and all items

they desire from the weekly Share. Although we will assist with transmissions, it is the responsibility of the contributor to make arrangements for pick up of the share.

As always, non-CSA Members may request single items from the share list for \$10 per item. A full share for one week (any/all items) is \$20, and \$50 for one month. Annual shares are recommended, at \$300 per year. Five-month shares are \$200.

Just reply using the website contact link if you desire anything on the list. We suggest non-shareholders start an account to cover costs of items.

EGGS Eggs are suspended.

Honey: Local West Pasco honey is available in 8 oz. bottles for \$7.00 (\$5.50 for shares).

Seeds: If you would like organic vegetable seeds for your garden, we will order them for you. Seed packs are \$4.00 each, 2 for \$7.00, and 5 for \$14.00. Just tell us what you'd like. Be sure to send your mailing address. No charge for shipping.

Seedlings: We are also happy to start plants for you. Just give us the word on the plants you want us to start, and we'll do the rest. Starter plants in cells are \$2.00 per plant (\$1, for shares), \$3.00 for 2, \$5.00 (\$4) for four, \$8.00 (\$6.00) for nine. When available, small plants are \$3.00 (\$2.40) each, and medium plants are \$5.00 (\$4).

Let us know if you want to acquire seeds or starts for spring and summer.

Trees: Young Loquat trees are available in small (half-gallon) and medium (gallon) pots - \$10.00 (\$8.00 for shareholders). \$20 (\$18) for two-gallon pots. Larger trees in five-gallon pots are \$50 to \$70, depending on the size of the tree.

Vermipost and Worms: For folks interested in organic gardening, we have the best all-natural soil amenities you can find: Vermipost and Worms! Vermipost is compost that has been broken down and enriched by Red Worms. We also have the worms themselves. **Vermipost** is available in 32 oz containers for \$2.50 each (\$2.00 for shareholders), with discounts for orders of five or more. Vermipost containers will most likely have some worms in the mix. We recommend mixing the vermicompost 1 to 1 with regular soil, and 1 to 3 or 4 with organic soil. Remember, if you use synthetic chemicals (such as fertilizers or pesticides), the vermicompost will be compromised. Pesticides will kill the worms and synthetic fertilizers will kill the worms or drive them away.

Worms are available in 32 oz containers for \$7.50 (\$6 for shareholders). We cannot specify the exact number of worms in a container, but there should be 30-50. By the way, if you are developing an organic garden, always look for the OMRI seal of approval on fertilizers, soils, and insect deterrents.

Seeds: Shareholders are entitled to samples of seeds from our seed bank – three types of okra, arugula, and our famous Calabrese broccoli. Our seeds are organic and derived from heirloom stock. They are listed with Seed Savers Exchange, and also available at the New Port Richey Library Seed Exchange. Let us know if you are interested – additional packages of seeds for \$4.00 (\$3.00) a packet (of 30). We cannot guarantee germination, but in our tests germination rates are close to 100%.

Heirloom, organic seeds from Seed Savers Exchange are \$4.00 each (\$3.00 for shares). You may order Seed Savers seeds from us. Find the seeds you desire on line, and let us know, and we'll order them for you.<http://www.seedsavers.org/onlinestore/> Florida Central West Coast acclimated Broccoli seeds are offered by 3F: \$3.00 for 30.

Local Markets and Growers' Sites Open to the Public Endorsed by Friendship Farms & Fare

Rose's Bistro Off Main: We encourage folks to patronize Rose's Bistro in New Port Richey, and other local produce markets. The Bistro often has organics, usually has local produce, is locally owned, and is a distributor of Seed Savers Exchange Heirloom Organic Seeds . Here is the facebook page: <https://www.facebook.com/TheMarketOffMain>

Tasty Tuesdays: Visit the New Port Richey Library Tuesday (10:00 AM – 12:00 noon) for a good selection of locally grown organic vegetables. [New Port Richey Public Library, 5939 Main St, New Port Richey, FL](#)

Freedom House Farms: Open to visitors on Saturday afternoons. Featuring freshly harvested produce available for purchase. 5642 Virginia Ave., New Port Richey

First Farm: Receptive to visitors on weekend afternoons. Featuring seeds, seedlings, Loquat trees, and select produce in season. Call for appointment afternoons or evenings: (727) 849-1626. New Port Richey.
